- Trilock 75ET: coin and token collection

All Boon Edam secured entry solutions can easily be integrated with virtually any access control system.

Dimensions and Specifications

A	B	C	D	E	F	G			
Passage Width (mm)	Capacity / Minute*	Disabled Access	Type of Traffic	Overall Width (mm)	Arm Length (mm)	Arm Height (mm)	Overall Height (mm)	Unit Length (mm)	Unit Width (mm)
444	15-20	x		610	394	800	965	914	203
493	15-20	x		711	443	830	965	914	203

* Depending on access control system, in one direction

Emergency Egress

The Trilock 75 is available with fail-safe or fail-secure operation. While the fail-secure model ensures that the entrance stays closed in case of emergency or power failure, the fail-safe model will free the passage by allowing free rotation of the arm set or automatically collapsing the horizontal arm down. Alternatively, if a fire alarm is connected, the fail-safe function can automatically be activated upon receipt of a fire alarm signal.

Technical Specifications

Power Supply: 220-240 VAC, 50/60 Hz

Power Consumption

Operating: 220W

Ambient Temperature: -15°C to +50°C

Weight: 90 kg
